PROJECTS

2017 - Present

TEXTMD - github.com/The-Log/textMD
Hackathon application aimed to bring medical tools to impoverished areas of the world, where Internet is difficult to access, by using texting. It won the Grand Prize and was the 2nd most liked Grid Data-structure at BigParser's 2017 Summer Hackathon.

2017 – Present

#TRENDINGINMEDICINE - http://trendinginmed.ml
Project started by a couple of my friends and me during HackTJ 2017. It grabs each month's trendy words from a group of medicine journals and displays them as hashtags on the Trending Page much like Twitter.

2017

PRICE-AGGREGATOR - github.com/The-Log/price-aggregator
Final Project for Web Application Development that displayed prices for products from various retailers while also creating a product price history.
